

ATLANTIC

OCEAN

SERIES DESCRIPTION

Graphic, colored, gridded (10,000 meter, British
Scale, Blue).

5 sheets, based on Polyconic projection and Green-

Various Iberian Peninsula maps (principally
1943 aerial photographs).

COMPI- LATION PROCEDURE: AMS compilations were
based on shorelines, large city outlines and align-
ment of highways were revised from aerial photos. Air
photos of AMS on the compilation boards, prior to draft-
ing. Hand color separation was accomplished on
individual sheets from compilation.

CHARACTERISTICS: Contours shown at 100 meter interval
with a heavy contour. Twenty meter auxiliary con-
tours shown in flat areas. Altitude tints are shown. Spot
heights indicated. Symbolization follow AMS standards.

REFERENCES: Michelin road maps, 1:400,000, were
used for location of roads and railroads. Roads are well
shown in detail.
